Mirr Swing Glass Door

Mirr Swing Glass Door

In the Essential range, Scigno has created a swing glass door flush with the wall.

With its refined style, clean lines and imperceptible profile, it aligns perfectly with the frame, creating a fusion between door and environment.

The door, with single or double glass, 5 cm thick, is available in different types of glass: clear, bronzed, etched, smoky grey, extra clear transparent, extra clear etched, smoked reflex and lacquered back. There is also a wide choice of colours for the internal aluminium perimeter structure.

The Mirr Swing glass door can be supplied in both single and double sheet solutions, to best meet all living needs and exploit the different types of glass.

The light weight of the glass and the transparency, which allows the light to filter through, make the Mirr Swing Glass door a real furnishing accessory able to give a touch of refinement to the environment.

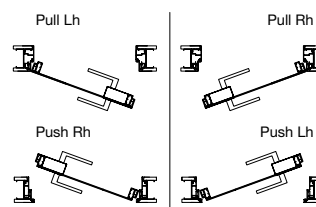

Measurements and Opening directions

Commercial Opening L x H	Door Lp= L+20 x Hp= H+5	Notes
600 x 1800÷2200	620 x 1805÷2205	3 Hinges
